### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1 and 6 are rejected under 35 U.S.C. 102(a) as being anticipated by U.S. Patent No. 6,676,501 ("Beaudry").

Beaudry discloses an abrasive pad comprising:

- the abrasive surface of instant claim 1 (see col. 3, line 32);
- the elastomer backing of instant claim 1 (see col. 3, line 37);
- the slits and flaps of instant claim 1 (see fig. 1a); and
- the cylindrical shape of instant claim 6 (see fig. 1a).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1615

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beaudry in view of U.S. Patent No. 3,775,014 ("Rosborne").

Beaudry discloses an abrasive pad (see above). Beaudry explains that the disclosed pad is beneficial because it has a work portion and a grip portion (see col. 1, lines 11-12).

Beaudry differs from the instant application in that it does not disclose the sponge material of instant claim 2 and 13 or the ring of instant claims 3-5, 7, 10, and 12. However Rosborne discloses an abrasive pad comprising a sponge material (see col. 1, line 67) and a ring (see fig 3, item 8).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to disclose an abrasive pad comprising an abrasive surface, an elastomer or sponge backing, flaps, and a ring, as taught by Beaudry in view of Rosborne. One of ordinary skill in the art at the time the invention was made would have been motivated to make such an article because it has a work portion as well as a grip portion, as explained by Beaudry.
